

# MEET FLEET

Translational showcase: where  
innovation and quantum  
intersect with industry

- Tap into FLEET's quantum expertise and resources to benefit your business
- Discover how companies and universities co-develop advanced quantum technologies and create growth and value

20 Oct 2023  
2-5 PM

LEIGHTON HALL,  
SCIENTIA BUILDING  
UNSW SYDNEY

## Innovate with us

Get a competitive advantage by working with Australia's most talented pool of deep tech and quantum researchers.

Discuss opportunities for joint R&D programs, new product development, and co-creation of IP, with FLEET quantum expertise complementing your own technology development capabilities.

Do you make products in coatings, computing hardware, software, sensing, optical and electronic technologies, energy and defense industries? Join us to hear how leading researchers in semiconductors, electronic materials, nanofabrication and quantum technologies can help solve impactful challenges in your industry.

Discover a range of scientific know-how

Hear from successful industry - science partnerships

Build networks

Navigate funding and support programs
